Summary

I am capable, curious and hard-working Computer Science student, looking forward to my first work experience. I want to put my academic Software Developer skills to use in the industry.

Skills

• HTML, CSS, JS, ReactJS Library NodeJS Express, Rest APIs, PHP

• MySQL and PostgreSQL Agile, Data Structure and Algorithms

• Basics of Docker, GitHub, Numpy Matplotlib, Pandas, some PyTorch

• OOP, Java, Python, C, C (POSIX), Other

Experience

• I have experience building and deploying web applications and PWAs (progressive web apps) for Android and IOS.
• I have experience with data structures and algorithms both from university and personal projects
• Web application for managing characters in a "Cityofmist" TTRPG. (deployed)
• Web application of "The Mind Game" we made with team of 3 people.

Education

French-Azerbaijani University - UFAZ
Computer Science, in progress. 2020-2023

Certification

ActInSpace Hackathon
I have worked together in a team to come up with solutions for pandemic prediction. I contributed by making a prototype for the demonstration of the disease prediction algorithm with simple simulated cities and charts showing the spreading of disease in real time in matplotlib library of Python.

Languages

Azerbaijani, English, Russian, Turkish, French
